SUPER DEODORANT BLOCK

(A safe to use vapor deodorant)

SUPER BLOCKS are intended to destroy odors by released vapors from the block. Being water insoluble, they are not intended to be placed in the water flow.

SUPER BLOCKS are air soluble and will dissipate.

SUPER BLOCKS have a pleasant odor, which is enhanced by a cherry aroma.

SUPER BLOCKS are solid and can be cut to meet the individual requirements.

SUPER BLOCKS act as an insecticidal fumigant, another desirable feature over plain deodorants

SUPER BLOCKS may be supported or hung in wet wells, sewers and many other uses. The area should be well ventilated inasmuch as the vapors can be irritating.

SUPER BLOCKS are an aromatic halogenated hydrocarbon, contains no petroleum products.

SUPER BLOCKS are plastic covered prior to use. Rubber gloves are advisable where there is prolonged contact. Do not rub the eyes with contaminated hands.

GENERAL DATA

Melting Point	53.5 C
Flash Point	150 F
Non-corrosive	
Non-staining	
Prolonged exposure may cause dizziness	
Insoluble in water
